DETAILED ACTION

1. The amendments of 12/29/2008 have been entered in full. Claims 1-4, 10, 11, 34-37, and 39-44 are cancelled. Claims 5-9, 12-33, and 38 are under examination.
2. A summary of a telephone interview with Applicant's representative David Hibler on 3/13/2009 is included with this office action.
3. All prior objection/rejections not specifically maintained in this office action are hereby withdrawn in view of the claim amendments and persuasive arguments filed 12/29/2008.

Specification

4. The amendment filed 12/29/2008 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The amended Table 1 shows only one of the two originally disclosed conditions that resulted in greater than 60% TH+ cells; it shows distinctly different yields of TH+ cells for two other sets of conditions as compared to Table 1 as originally filed; and it adds experimental detail ("Not sorted") that was not previously associated with the particular set of culture conditions now shown. Although these changes do not alter the description or enablement of the embodiment of the method now claimed, the changes create a different teaching as to the effects of media components on yields as compared to Table 1 as filed.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 31 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 31 recites the method of claim 5, wherein the differentiation media further comprises one or more differentiation agents selected from a group that includes N-acetyl cysteine. Independent claim 5 recites a differentiation medium that includes N-acetyl cysteine. Therefore the embodiment of the method of claim 31 that comprises N-acetyl cysteine might be construed as a duplicate of claim 5, or it might indicate that an additional amount of N-acetyl cysteine should be present. This is not clear.

Conclusion

7. Claims 5-9, 12-30, 32, 33, and 38 are allowable.
8. Claim 31 is rejected.
9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
